MEMORANDUM FOR: Director of Joint Computer Support, DD/M&S

Dear Jack:

This memorandum transmits to you a complete package on "Proposed Replacement of Facilities Supporting Computers and Other Equipment Requiring Controlled Environment" that we recently submitted to Harold Brownman. As you will note, Harold's comments approve the "release of this study to the affected components" but, in lieu of doing that at this time, I prefer to send the package to you. As we both know, organizational and tactical/political considerations are involved as well as space and engineering.

It seems to me to make sense, accordingly, that we ask you to read this document, and then you, Glenn [redacted] and I sit down together and have a little chat about the matter. Would you be good enough to telephone me when you have it read, and we will establish a date to meet with you.

Signed: John F. Blake
